RESEARCH/WORK EXPERIENCE

PhD in Bioinformatics and Bacterial Genomics

Sep 2015 - Present

McMaster University, Hamilton, ON

- Development and innovative application of advanced R functions, simulations, data analysis and other computational techniques to research phenomenon in molecular evolution and bacterial genomics.
- Familiarization with bioinformatics tools and experimental design related to data visualization, statistics, genomic data analysis, genetics, sequence annotation, molecular evolution, gene expression, and genome assembly.
- Create detailed documentation on operating procedures for computational pipelines.
- Considerable training in high performance computing and programming (**Unix/Linux**), data visualization, statistical analysis, big data storage, and software tool development (**Bio-Conductor** libraries) and version control (**Git**).
- Independently designed and implemented experimental tools for bio-statistical testing and analytical processes using R, Python, and Perl, resulting in two first author publications [2, 1].
- Collaborated with students, professors and other academics from the Anthropology, Health Sciences, Mathematics, and Statistics departments to complete complex projects related to microbial evolution, infectious disease, and ancient DNA in a timely and reliable manner.
- Managed undergraduate student research projects by providing vision and direction regarding experimental design, research, and task distribution resulting in a successful projects.
- Concisely communicated scientific research to field specific, public audiences, and funding agencies of up to 230 people at 4 international conferences, culminating in overwhelming positive oral and poster presentation feedback.
- Awarded National and local funding for research by editing and writing grants outlining the proposed and completed research on bacterial genomic evolution.
- Generated progress reports for funding agencies tracking research projects, cost and inventory of research materials, and summary of the investigation, resulting in renewal of grants.
